

Sentry II

Series 960 Residential Water Softener

What is an On-Demand Metered System?

Your Sentry II 960 is equipped with a microprocessor that keeps track of the amount of water used each day and adjust automatically to match your needs. Your water softener is meeting your demands for conditioned water in a customized way! The system only regenerates when it needs to. This saves you up to 50% in salt and uses less water making it both efficient and economical.

Quality

The Sentry II is manufactured using only high quality parts and state of the art equipment, to ensure long life and reliability.

Efficient

The Sentry II monitors the amount of water used and adjusts accordingly. This minimizes the waste of salt and water.

Economical

The Sentry II water softener only regenerates when needed. The system is designed for on-demand use and does not operate on a timed system. This saves you money.

Improved Appliance Performance

Your appliances will last longer and operate better when you use a Sentry II water softener. Your dishes will be cleaner and clothes kept brighter. The Sentry II 960 is designed to fit your specific needs while saving you money too.

Easier on Hair and Skin

Do you have sensitive skin? Dry, tangled hair? The Sentry II water softener conditions water to help reduce skin irritations. It will add luster to your hair leaving it soft and easy to groom.

Showers, Sinks and Faucets

When you use a Sentry II 960 your kitchen faucets and shower tile will look better and feel cleaner because conditioned water removes much of the mineral deposits that leave faucets spotty and your shower scaly.
