

# Sentry II

*Residential Water Softener*

Series 960

Electronic On-Demand Metered System

## *What is an on-demand metered system?*

Your Sentry II is equipped with a microprocessor that keeps track of the amount of water used each day and adjusts itself to match your needs. If you begin using more or less water, the system automatically adjusts to the change in water usage. This means the water softener is meeting your demands for conditioned water in a customized way. You don't have to do a thing! The system does not regenerate unless it needs to. This saves you up to 50% in salt and uses less water making it economical and efficient too. You can depend on a Sentry II to provide you with a continuous supply of conditioned water.

## IMPROVED APPLIANCE PERFORMANCE

## CLEAN, SHINY FAUCETS

*When you use a Sentry II water softener your faucets, shower tile and glass will look better and feel cleaner because soft water removes much of the mineral deposits that leave your faucets spotty and your shower scaly.*

Silverware and glasses will take on a new shine with the Sentry II water softening system. Dishwasher performance improves and your dishwasher will last longer because conditioned water prevents scale buildup in the water heater and water lines. Your dishwasher will run smoother and more efficiently.

Do you have sensitive skin? Dry hair? Conditioned water helps reduce skin irritations and adds a healthy luster to hair leaving it soft and easy to groom. You will use less shampoo and conditioner too.

When you use a Sentry II water softener your clothes will last longer, the colors will stay brighter and the clothing will be cleaner and softer. It will also extend the life of your washer as well by preventing mineral buildup and scale. It also saves money using less detergent and soap by up to 70%!

*The Sentry II is manufactured with only state of the art equipment providing you with a superior product.*
