

# Sentry II

Residential Water Softener System  
Series 960

## Electronic On-Demand Metered System

### *What is an on-demand metered water softener?*

Your Sentry II is equipped with a microprocessor that keeps track of the amount of water used each day and adjusts itself to match your needs. If you begin using more or less water, the system automatically adjusts to the change in water usage. This means the water softener is meeting your demands for conditioned water in a customized way. You don't have to do a thing! The system does not regenerate unless it needs to. This saves you up to 50% in salt and uses less water making it economical and efficient too. The Sentry II uses state of the art equipment to provide you with a superior product and a continuous supply of conditioned water.

#### Quality

The Sentry II water softener is manufactured using only high quality products and state of the art equipment for long life and reliability.

#### Efficient

The Sentry II water softener only regenerates when needed. The system regenerates based on demand and not on a timed system.

#### Economical

The Sentry II water softener monitors the amount of water used and adjusts accordingly. This minimizes waste of salt and water.

## Benefits of a Sentry II Water Softener

### Laundry is cleaner, colors brighter

When you use a Sentry II water softener your clothes will last longer, the colors will stay brighter and the clothing will be cleaner and softer. It will also extend the life of your washer as well by preventing mineral buildup and scale. It also saves money by using less detergent and soap by up to 70%!

### About your Sentry II

The Sentry II water softener is an on-demand metered system designed to be the most efficient and economical water softening system on the market today.

The 1" full port design allows for the highest flow rates available for the 1" system.

With a state of the art electronic microprocessor the system backs up the program memory without the use of a battery.

Premium quality water softening resin is used to ensure trouble-free operation.

The reserve capacity is self-adjusting to ensure that you always have a continuous supply of conditioned water.

### Improved dishwasher performance and less spotting on glass and silverware

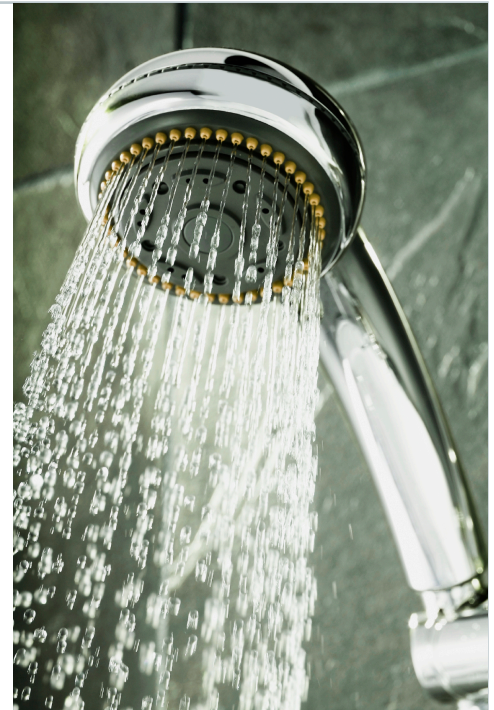

Silverware and glasses will take on a new shine with the Sentry II water softening system. Dishwasher performance improves and your dishwasher will last longer because conditioned water prevents scale buildup in the water heater and water lines. Your dishwasher will run smoother and more efficiently.

## Softer skin and smoother hair

When you use a Sentry II water softener your faucets, shower tile and glass will look better and feel cleaner because conditioned water removes much of the mineral deposits that leave your faucets spotty and your shower scaly.

Do you have sensitive skin? Dry hair? Conditioned water helps reduce skin irritations and adds a healthy luster to hair leaving it soft and easy to groom. You will use less shampoo and conditioner too.

## Reduces mineral buildup on faucets
