

Residential Water Softener

Electronic On-Demand Metered System

“Providing efficient service for maintaining continuous conditioned water to your household.”

Sentry II

Series 960

The Sentry II Series 960 is an on-demand metered system designed to be the most efficient and economical water softening system on the market today

What can a Sentry II Water Softener do for your home?

When you use a Sentry II water softener your faucets, shower tile and glass will look better and feel cleaner because conditioned water removes much of the mineral deposits that leave your faucets spotty and your shower scaly.

The clothes washed in your Sentry II water softener will last longer, the colors will stay brighter and the clothing will be cleaner and softer. A Sentry II water softener will extend the life of your washer as well by preventing mineral buildup and scale. And it saves money, using less detergent and soap by up to 70%!

About the Sentry II

Because it is on-demand the Sentry II is highly efficient. It is an intuitive system that automatically customizes to your water needs. It will save you money because it only regenerates when you need it to and is not based on a timer. Only high quality parts are used in the manufacturing of the Sentry II water softeners.

What is an on-demand metered water softener?

Your Sentry II is equipped with a microprocessor that keeps track of the amount of water used each day and adjusts itself to match your needs. If you begin using more or less water, the system automatically adjusts to the change in water usage. This means that the water softener is meeting your demands for conditioned water in a customized way. You don't have to do a thing! The system does not regenerate unless it needs to. This saves you up to 50% in salt and uses less water making it economical and efficient too. The Sentry II uses state of the art equipment to provide you with a superior product and a continuous supply of conditioned water.
