

Sentry II

Series 960

Electronic On-Demand Metered System

About the Sentry II Series 960

The Sentry II Series 960 is an on-demand metered system designed to be the most efficient and economical water softening system on the market today.

Benefits of a Sentry II Water Softener

- Extends the life of your appliances such as dishwashers, water heaters and clothes washers by reducing the mineral buildup that wears out the machine.
- Dishes are cleaner and conditioned water minimizes spotting on silverware and glasses.
- Laundry will be cleaner, softer and colors kept bright.
- Helps reduce skin irritations and adds a healthy luster to hair, leaving it soft and easy to groom.
- Reduces mineral deposits and buildup on faucets and shower tile or glass.

What is an On-Demand Metered Water Softener?

Your Sentry II is equipped with a microprocessor that keeps track of the amount of water used each day and adjusts itself to match your needs. If you begin using more or less water, the system automatically adjusts to the change in water usage. This means the water softener is meeting your demands for conditioned water in a customized way. You don't have to do a thing! The system does not regenerate unless it needs to. This saves you up to 50% in salt and uses less water making it economical and efficient too. The Sentry II uses state of the art equipment to provide you with a superior product.

Efficient

Because it is on-demand the Sentry II is highly efficient. It is an intuitive system that automatically customizes to your water needs.

Economical

You will save money using the Sentry II water softener because it adapts to the changing water usage minimizing waste of salt and water

High Quality

The Sentry II water softener is manufactured using only high quality products and state of the art equipment for long life and reliability.

Facts about your Sentry II water softening system:

The 1" full port design allows for the highest flow rates available for the 1" system.

Uses a state of the art electronic microprocessor system that backs up the program memory without the use of a battery.

Premium quality water softening resin is used to ensure trouble free operation.

The reserve capacity is self-adjusting to ensure that you always have a continuous supply of conditioned water.
