Sentry II

Residential Water Softener

What Can A Sentry II Water Softener Do For You?

Silverware and glasses will take on a new shine with the Sentry II water softening system. Dishwasher performance improves and your dishwasher will last longer because conditioned water helps prevent scale buildup in the water heater and water lines.

A Sentry II water softener can improve the function of your washing machine. Your clothes will come out cleaner and maintain their original color.

Do you have sensitive skin? Dry, tangled hair? Conditioned water helps reduce skin irritations and adds a healthy luster to hair leaving it soft and easy to groom.

When you use a Sentry II water softener your faucets, shower tile and glass will look better and feel cleaner because conditioned water prevents much of the mineral deposits that leave your faucets spotty and your shower scaly. Reduced mineral deposits allow for better faucet performance too.
